Detergent compsn. for dry cleening, having high detergency and storage stability - contains surfactant e.g. phosphoric ester sails and quat. ammonium saits and lactic aikyl ester and has good resoiling preventing performance
C92-189984

Detergent compsn. contains a petroleum hydrocarbon solvent(s). It more pref. contains additionally one or a mixt. of lower alcohols and alkylene glycol mono-lower-alkyl ethers.

Pref. the lactic ester is pref. one or a mixt. of methyl, ethyl and butyl lactates. The blend ratio of the lactates is usually 5-50 wt.%,
pref. 10-40 wt.%, Available surfactants include higher fatty acid saits, phosphoric ester saits, suphuric ester saits, quat. ammonium saits and fatty acid aikanol amides. The blend ratio of surfactants is usually 10-70 wt.%, pref. 20-50 wt.%, Other available ingredients include methanol, 3-methyl-3-methoxybutanol, propylene glycol monomethyl ether, paraffin and aromatic hydrocarbons.

USE/ADVANTAGE - The compsn. has high storage stability, detergency, resoiling-preventing performance and safety, even without halogenated hydrocarbon and petroleum solvents. (3pp Dwg.No.0/0)
